

# February Resales Snapped up Quickly

**OTTAWA, March 3, 2021** - Members of the Ottawa Real Estate Board sold 1,390 residential properties in February through the Board's Multiple Listing Service® System, compared with 1,134 in February 2020, an increase of 23 per cent. February's sales included 1,028 in the residential-property class, up 24 per cent from a year ago, and 362 in the condominium-property category, an increase of 19 per cent from February 2020. The five-year average for total unit sales in February is 1,101.

"Resale properties are virtually flying off the shelves," states Ottawa Real Estate Board President Debra Wright. "Even though our inventory is significantly lower than 2020 - a combined 46% decrease in housing stock for residential and condos – we witnessed a record number of sales in February 2021. How is that possible? Simply put, properties that come onto the market are selling very quickly."

"With less than a month's supply in both categories, residential homes, in particular, are experiencing the guickest turnarounds. This is evidenced in the sharp decline of Days on Market (DOM) from 30 days in February 2020 to 14 days last month. Interestingly, DOM for the condo market has gone up slightly from 19 to 22 days, likely due to the fact that the condo market was thriving and moving very quickly prior to the pandemic spread in Canada. We saw Buyer desire for more house space dampen that market temporarily; however, it is clear the condo market has stabilized and is starting to rebound

with a 19% increase in transactions compared to last year at this time."

February's average sale price for a condominium-class property was \$407,671, an increase of 17 per cent from last year, while the average sale price of a residential-class property was \$717,914, an increase of 27 per cent from a year ago. With year-todate average sale prices at \$701,778 for residential and \$395,496 for condominiums, these values represent a 29 per cent and 15 percent increase over 2020, respectively.\*

"With supply constraints continuing to place upward pressure on pricing, there is no doubt that this economic fundamental is driving the price increases. This is also reflected in February's total sales volume for residential and condos, which combined was at \$885,592,105, 54% higher than the same month in 2020. There is no denying that scarcity is leading to a more rapid price acceleration. This scarcity combined with Buyers' willingness to pay and compete in this market will

continue to drive up the sales prices," Wright asserts.

"The upcoming spring market will bring more listings and increased inventory; however, the question is whether it will be enough to meet demand. Having a sound strategy, whether you are buying or selling, is the key to success. In this complex and fastpaced market, it is essential to utilize the skills and experience of a REALTOR® with negotiation skills and the market knowledge to act quickly on your behalf."

"Did you know they also help tenants locate rental accommodations in addition to assisting landlords in finding tenants? Ottawa's vacancy rates have soared due to the lack of immigration, visiting student populations, decline in Airbnb, etc. There are many good quality rentals out there, and a REALTOR® can help you find one whether you are selling and prefer to rent or searching for a different location," Wright concludes.

OREB Members assisted clients with renting 674 properties since the beginning of the year compared to 498 at this time last year.

\* The Board cautions that the average sale price can be useful in establishing trends over time but should not be used as an indicator that specific properties have increased or decreased in value. The calculation of the average sale price is based on the total dollar volume of all properties sold. Price and conditions will vary from neighbourhood to neighbourhood.
